# Hotels & Resorts

Hotel and all-inclusive resorts are popular for guests seeking a “one-stop-shop” approach to vacationing. With so many amenities and entertainment options available, identifying guests can be time-consuming. Our hotel and resort wristbands provide numerous benefits for staff and guests alike, including improving security and controlling access for special areas, events, and amenities, as well as boosting branding.

For larger hotels and resorts, wristbands can be used to help coordinate special events such as corporate retreats, conventions, or weddings. If several large events are being held simultaneously, you can issue different types and color of wristbands to differentiate types of guests.

Hotel and resort wristbands help age verification if alcohol is being served. Guests over 21 can be given non-transferable colored wristbands, so bartenders and staff know it is okay to serve them alcohol beverages. Using wristbands eliminates the need for staff to re-check IDs; thus increasing security, speeding up concession lines, and increasing guest spending.

All-inclusive resorts often offer a lot of amenities such as pools, fitness centers, waterslides, and more. Hotel and resort wristbands are helpful for controlling access to specific guests such as VIPs or children. For example, if only children over the age of ten are allowed in a specific pool or waterslide, they can be issued a wristband to differentiate them from younger children and increase their safety.
